FOR IMMEDIATE RELEASE

SCOTTSDALE, Ariz. (November 2, 2009) – [Thermo Fluids, Inc.](#), a recognized leader in the U.S. [environmental services](#) and [oil recycling](#) industry, has appointed Greg Bohne as its Southwest Region Manager. Based in the company’s Phoenix Southwest Regional offices, Bohne will be responsible for sales and operational activities in Nevada, New Mexico, Arizona and El Paso, Texas. Prior to joining Thermo Fluids, Bohne was president of Connelly Billiard Manufacturing in Tucson, Ariz., where he was responsible for the operations, distribution, manufacturing, sales, marketing and retail operations for this worldwide billiard table company. Under his leadership, the company’s revenue grew from \$7 million to \$24 million in three years. Bohne had previously worked for Browning-Ferris Industries, Inc. (BFI), at one time the world’s second largest waste removal, portable services and recycling company.

“Greg is experienced in all aspects of running both large and medium sized businesses,” said James Devlin, Thermo Fluids’ chief executive officer. “Coupled with his background in the recycling industry, this operations experience will be helpful in navigating the ever-changing waters of the environmental services and oil recycling industries. We are very pleased that Greg decided to join the Thermo Fluids team.”

About Thermo Fluids

[Thermo Fluids Inc.](#), a closely held portfolio company of [CIVC Partners](#), is an environmental services company and the largest producer of commercial fuel oil from recovered used motor oil in the Western United States. Headquartered in Scottsdale, Ariz., the company collects and purchases used motor oil from a large number of companies across a diverse range of industries, such as quick-lube centers, auto dealerships, mining operations, and industrial companies. In addition to collecting used motor oil, the company provides a portfolio of environmental services as a “one-stop” solution to its customers. These other essential services include oily wastewater collection and processing, spent antifreeze collection and recycling, and used oil filter collection and disposal. Thermo Fluids reprocesses and recycles its collected used motor oil into a commercial fuel product that is sold as an alternative energy source to a variety of industrial

customers. Thermo Fluids has 29 facilities serving the Western United States. For more information, visit www.thermofluids.com.
