

**Thermo Fluids promotes Hacker to mountain states regional manager; names Haney as EH&S manager**

SCOTTSDALE, Ariz. (June 17, 2010) – [Thermo Fluids, Inc.](#) has promoted Troy Hacker to mountain states regional manager. As regional manager, he is responsible for sales and operational activities in Utah, Colorado, Wyoming and Reno, Nevada. Before being promoted, Hacker served as the environmental, health and safety manager.

Hacker oversaw and enforced safe working procedures at Thermo Fluids for more than 10 years, and played a fundamental role during Thermo Fluids' development stage. As EH&S manager, he executed environmental due diligence while implementing company policies and procedures to newly acquired businesses.

Taking over the role as EH&S manager for Thermo Fluids is Brian Haney who previously held the position of safety and environmental protection manager at Waste Management. During his time at Waste Management, Haney developed and enforced all safety and environmental compliance requirements. He is a member of the development team for the Occupational Safety & Health Administration's (OSHA) Corporate Voluntary Protection Program, and drastically reduced employee injuries at Waste Management from 2003 to 2010. Haney is an active member of multiple committees dealing with water quality assurance and local emergency planning.

“Brian's industry knowledge and dedication will make for a smooth transition as Troy moves to the regional manager position,” said James Devlin, Thermo Fluids' chief executive officer. “Both of these men have demonstrated valuable leadership qualities and I am thrilled that they are a part of the Thermo Fluids team.”

**About Thermo Fluids**

[Thermo Fluids Inc.](#), a closely held portfolio company of [CIVC Partners](#), is an environmental services company and the largest producer of commercial fuel oil from recovered used motor oil in the Western United States. Headquartered in Scottsdale, Ariz., the company collects and purchases used motor oil from a large number of companies across a diverse range of industries, such as quick-lube centers, auto dealerships, mining operations, and industrial companies. In addition to collecting used motor oil, the company provides a portfolio of environmental services as a “one-stop” solution to its customers. These other essential services include oily wastewater collection and processing, spent antifreeze collection and recycling, and used oil filter collection and disposal. Thermo Fluids reprocesses and recycles its collected used motor oil into a commercial fuel product that is sold as an alternative energy source to a variety of industrial customers. Thermo Fluids has 29 facilities serving the Western United States. For more information, visit [www.thermofluids.com](http://www.thermofluids.com).
